

ET 150.02

Tool set

Specification

- [1] commercial tools for the assembly and servicing of refrigeration systems
- [2] battery operated leak detection device suitable for refrigerant R513A
- [3] digital multimeter for direct and alternating current, battery operated

Technical data

LxWxH: 420x210x180mm (case)
Weight: approx. 12kg

Scope of delivery

- 1 case
- 1 set of tools
- 1 leak detection device
- 1 multimeter

Description

■ case with tools for the assembly and maintenance of refrigeration systems

With the ET 150.02 accessory, maintenance work and troubleshooting of refrigeration systems are carried out.

One of each of following tools is included: pipe cutter, adjustable spanner, jointing clamp, flanging tool, manual countersink, side cutter, cable stripping knife, crimping tool, wire strippers, set of Allen keys (7 pieces), set of pipe bending pliers (3 pieces), set of screwdrivers (4x straight, 2x Philips), set of ring spanners (17 pieces), steel ruler, small saw, deburring miller, file.

A multimeter is included for electrical fault finding. The leak test in refrigeration systems is carried out using a high quality leak detection device for refrigerant gases.

A stable plastic tool case is included.
