Description

■ accessory set for the ET 910 training system

The ET 910.12 accessory set is required to connect the individual components of the ET 910 training system hydraulically and electrically. Using the accessory set, it is possible to connect the components from ET 910.10 or ET 910.11 to the ET 910 training system to form a complete refrigerating plant.

The accessory set includes hoses, shut-off valves, lines, connectors and T-pieces.
