

HM 130.01

Plastic tank with submersible pump

Specification

- [1] simple arrangement for setting up a closed water circuit for HM 120
- [2] plastic tank with submersible pump

Technical data

Submersible pump

- power consumption 550W
- max. head: 11m
- max. flow rate: 225L/min

Plastic Tank: 30L

230V, 50Hz, 1 phase
 230V, 60Hz, 1 phase
 120V, 60Hz, 1 phase
 UL/CSA optional
 Tank diameter: 310mm
 Tank height: 510mm

Scope of delivery

- 1 plastic tank with submersible pump
- 1 set of connecting hoses

Description

■ water supply and closed water circuit for HM 120

Using this simple arrangement, it is possible to provide a supply of water for HM 120, e.g. if there is no mains water supply where the equipment is to be used.

HM 130.01 includes a plastic tank with a powerful submersible pump and connecting hoses.
