

MG 903

Screw-locking devices kit

The illustration shows a similar unit

Description

- **extensive kit of screw-locking devices**
- **standardised designations, terms and applications**

Screw-locking devices are designed to prevent the unwanted loosening of screw connections because of external influences such as vibration or corrosion. The lock machine element is added to a screw connection by the manufacturer as an additional component.

This kit is used for demonstration and information. It is not designed for performing exercises or experiments. Screw-locking devices are shown in their installed state on an aluminium plate. A transparent box contains a large number of Screw-locking devices.

The kit is arranged clearly in a storage system.

Learning objectives/experiments

- familiarisation with screw-locking devices and their specific applications
- familiarisation with relevant standardised designations and terms including the graphical representation

Specification

- [1] kit of screw-locking devices
- [2] 18 assembled screw-locking devices arranged clearly on an aluminium plate
- [3] transparent container with 18 compartments, each containing 10 pieces of the different screw-locking devices
- [4] all parts arranged clearly in the storage system
- [5] multiple storage systems can be stacked on top of each other

Technical data

Aluminium plate, LxW: 238x100mm
Locking devices for M6

LxWxH: 510x360x120mm (storage system)

Weight: approx. 3kg

Scope of delivery

- 1 complete kit, arranged in storage system
- 1 set of instructional material
